Disclaimer:

The views expressed in this report are those of the authors alone and do not necessarily represent the opinions of the investigators participating in the survey, nor the view or policy of the Ministry of Health.

ACKNOWLEDGEMENT

The authors would like to thank the Director-General of Health Malaysia for his permission to publish this report. Appreciation to the Deputy Director-General of Health (Research and Technical Support) and the Director of the Institute for Public Health, for their support and technical advice throughout the various stages of the survey.

The National Health and Morbidity Survey 2014 : Malaysian Adult Nutrition Survey, was accomplished with budget support from the Ministry of Health Malaysia and technical advices from the Advisory Panel and Steering Committee. The authors would like to express their sincere thanks to them.

The authors thank all the State Health Directors and all State Liaison Officers who have been instrumental in mobilising resources during the data collection phase. Gratitude to all concern who have assisted in the implementation of the survey, from the field supervisors, nutritionists, temporary staff and drivers, without whom the survey would not have been a success.

Last but not least, sincere appreciation is extended to all respondents who had participated and contributed their time and information to the survey, without whom there would not be any findings to report.

Introduction

Population-based food consumption survey is crucial in establishing a comprehensive database of the types and amount of food intake, and the dietary pattern/practice of the population. Food consumption data can be used for food safety risk assessment to determine if the public is exposed to any potential dietary risks such as those from contaminants and food additives, and also to understand the size of the risk and which population groups may be most at risk. Such information is vital for the government in formulating public policies, risk management measures and education strategies to ensure food safety. As food consumption data vary considerably from country to country, the World Health Organization (WHO) recommended that individual country should estimate their own food consumption pattern.

The food consumption statistics compiled in this document was based on the results of the National Health and Morbidity Survey 2014: Malaysian Adult Nutrition Survey (MANS) conducted by Institute of Public Health, Ministry of Health Malaysia.

Methodology

Sampling design and sample size

This nation-wide survey covered all states in Peninsular Malaysia and the two states comprising of Sabah and Sarawak in East Malaysia. A total of 4,000 nationally representative samples of Malaysian adults in selected households aged between 18 and 59 years old were chosen randomly. The data collection was carried out between March and June 2014. There was a total of 165 itemized food items asked in this survey.

The selected participants were interviewed in their homes, work places and any other vicinity that were comfortable and convenient to them. The respondent was not pregnant or breastfeeding at the time of the interview and not on specific diet due to illness.

A stratified random sampling was used for this survey, which covered two zones, Peninsular Malaysia and East Malaysia comprising of Sabah and Sarawak. The sampling units were the enumeration blocks (EBs) and Living Quaters (LQ). The sampling frame was provided by the Department of Statistics (DOS), Malaysia. The EBs in the sampling frame was classified into either urban or rural EB. The classification was given by the Department of Statistics Malaysia based on the population size of the gazetted and built-up areas. The study design was a cross sectional study which alllows national, West Malaysia urban-rural and East Malaysia urban-rural analyses.

The Food Frequency Questionnaire

A semi quantitative food frequency questionnaire (FFQ), with serving sizes as reference was used during the survey. A food photo album of foods and household measurements were used together with the questionnaire to assist the subjects in their responses. Each respondent was asked by a trained interviewer on the frequency of consumption of each food based on their habitual intake during the last one year. For each food item, the respondent was asked on the frequency of intake of each food item in the list either per day, per week, per month, per year or never. They were also asked on the number of servings each time the food was eaten. Each food item listed was given a standard serving size. Serving size included – piece, one whole fruits, match box size, cups and spoons and others. The serving size is measured as cooked food or foods ready for consumption. This was converted to average consumption per year. Foods eaten seasonally were also converted to average consumption per year.

The conversion of food frequency to the amount of food intake was carried out using the following formula:

Amount of food (g) per day = frequency of intake X conversion factor X serving size X total number of servings X weight of food in one serving (University of Southampton, 1995). The conversion factor used to estimate food intake was based on frequency of intake (Mustgrave et al, 1989).

The Questionnaire has a list of 165 foods commonly available in Malaysia. The foods are grouped into 13 categories as listed below:

A. Cereals and cereals products
B. Meat and meat products
C. Fish and seafoods
D. Eggs
E. Legumes and products
F. Milk and milk products
G. Vegetables
H. Fruits
I. Beverages
J. Alcoholic beverages
K. Confectionaries
L. Spreads
M. Condiments/miscellaneous

The food consumption statistics are presented according to national, geographical zones in Malaysia, strata, selected ethnic groups and sex for both total population and eaters only. It provides the estimated mean intake of each food in grams per day, standard error of mean, the estimated population, the prevalence (%), median and percentile values in grams per day of consumption among the adult population. The English translation for the 165 food items is given in Appendix 1.

FOOD CONSUMPTION STATISTICS OF MALAYSIA

APPENDIX

English translation for the 165 food items in the Food Frequency Questionnaire (FFQ)		
No.	**Malay**	**English**
1	Nasi putih	White rice
2	Nasi beras perang	Brown rice
3	Nasi berperisa	Flavoured rice
4	Bubur nasi	Rice porridge
5	Pulut	Glutinous rice
6	Mee kuning/mee siput/mee segera	Wheat Noodles
7	Mihun/Kueh teow/laksa/laksam/loh shi fun	Rice vermicelli/Rice noodle/Loh Shi Fun
8	Pasta	Pasta
9	Sagu/ambuyat/linut	Sago/Ambuyat/Linut
10	Roti	Bread
11	Roti bijirin penuh	Wholemeal bread
12	Roti bun	Bun
13	Roti canai	Roti canai
14	Capati	Chapati
15	Tosai	Tosai
16	Bijirin sarapan pagi	Cereals
17	Bijirin tersedia perlu dibancuh	Instant cereal
18	Jagung	Maize (corn)
19	Burger	Burger
20	Ayam goreng	Fried Chicken
21	Pizza	Pizza
22	Kentang goreng	French Fries
23	Kentang lenyek	Mashed potatoes
24	Coleslaw	Coleslaw
25	Sosej/hotdog/frankfurter	Sosej/hotdog/frankfurter
26	Nugget	Nugget
27	Ayam	Chicken
28	Burung puyuh	Quail
29	Itik	Duck
30	Lembu/kerbau	Meat
31	Kambing	Mutton
32	Organ dalaman (Hati, limpa, paru)	Internal organs (liver, spleen, lungs)
33	Bebola ayam	Chicken ball
34	Ham[2]	Ham[2]
35	Bacon[2]	Bacon[2]
36	Luncheon meat[2]	Luncheon meat[2]
37	Babi[2]	Pork[2]
38	Ikan laut	Marine fish
39	Ikan air tawar	Freshwater fish
40	Udang basah	Prawn
41	Sotong basah	Squid
42	Ikan dalam tin	Canned fish
43	Ketam	Crab
44	Ikan bilis	Anchovy
45	Kekerang	Shellfish
46	Siput sedut	Mud creeper

[2] Among non-muslim population only

English translation for the 165 food items in the Food Frequency Questionnaire (FFQ)		
No.	**Malay**	**English**
47	Ikan jeruk	Pickled fish
48	Sotong kering	Dried squid
49	Keropok ikan/udang/sotong/ketam	fish / prawn / squid / crab crackers
50	Keropok lekor	Keropok lekor
51	Bebola/kek ikan/udang/sotong/ketam	fish/ prawn/ squid/ crab ball or cake
52	Ikan kering	Dried fish
53	Telur ayam	Chicken eggs
54	Telur itik	Duck eggs
55	Telur puyuh	Quail eggs
56	Telur masin	Salted eggs
57	Kekacang	Legumes
58	Kacang tanah	Groundnuts
59	Taufufa	Soy bean mustard
60	Tauhu	Tofu
61	Tempe	Fermented soy beans
62	Susu segar	Fresh milk
63	Susu komersial	Commercial milk
64	Yogurt/lassi/tairu	Yogurt/lassi/tairu
65	Susu tepung	Powdered milk
66	Susu sejat/cair	Evaporated milk
